

CUSTOM CARBON SYSTEMS

SWT CUSTOM GAC FILTER SYSTEMS (FOR CHLORAMINES, RADON, VOC, BOD, ETC. REDUCTION)

SWT's Custom GAC Filter Systems with SWT's exclusive drain and media discharge ports offer versatile solutions to many health-risk and pollution problems. Designed for ease-of-use and easy carbon change-outs, these hard-working and customizable filters can be used where regular GAC filters are not enough. Safe Water Technologies' new contamination removal units are manufactured with a choice of special carbon media, sized and designed for optimum removal of chloramines, chlorine, VOC, BOD, radon, etc. At the same time these units can be used for bacteria and microorganism control as well. They also improve color, taste, odor, and the clarity of the water. SWT's Custom Carbon Systems are perfect for both residential and commercial use.

Applications

- Municipal induced mono-chloramines removal
- Chlorine and hydrogen peroxide removal
- Waste water clean up (BOD reduction)
- Gas and oil leaks
- Volatile organic and chemical compounds
- Radon removal
- Color removal
- Ultraviolet disinfecting
- Sediment filtration
- Excellent for both pre and post RO and DI filtration.

Features

- No need to disconnect plumbing to change out carbon or UV lamp
- Exclusive drain and carbon discharge ports
- Carbon refill ports
- Additional UV disinfecting chamber can be added to the unit (30,000 $\mu\text{W}\cdot\text{sec}/\text{cm}^2$ @ 9,000 hours) for post carbon bacteria sterilization
- Custom sizes and configurations available
- Available with coal, coconut, acid washed, and catalytic carbons in a variety of mesh sizes
- All international voltages available

Available as both backwashing and non-backwashing systems. Both styles feature the option of our patented UV technology for bacteria applications. SWT's exclusive carbon-bed flush port design, drain, refill port, corrosion-proof tank, and a choice of connections are included.
