

COMMERCIAL RO SYSTEMS

SEAWATER DESALINATION SYSTEMS (NOMINAL 35,000 TDS DESIGN)

Standard Features

- Energy efficient, high flow membranes
- 5 micron sediment pre-filter
- Allen-Bradley programmable controller
- Liquid level float with auto shut-off
- Auto-flush system
- Pre- and post-filter, feed, concentrate, and product water pressure gauges
- Visual inline flow meters
- Low pressure feed water switch
- Victaulic style 304 stainless steel housing connections
- Low pressure alarm capable
- Motor starter with safety disconnect

Optional Features

- 2 m³/d field portable system with gas or diesel powered generator
- Digital permeate TDS meter
- Automatic antiscalant dosing system
- Automatic or manual pH control dosing system
- Ethernet communication upgrade for the controller
- Digital permeate and concentrate flow meters with low level alarms
- Digital supply and concentrate pressure gauges with high level alarms
- Clean-in-place membrane maintenance station
- System shutdown during permeate flush
- Stainless steel wetted parts for liquid end of pump
- Step-down transformer from 3 phase to single phase
- Available in all international voltages

Operating Parameters

Operating Pressure	1000 psi
Min. Supply Pressure	15 psi
Max. Temperature	113°F (45°C)
Nominal TDS	35,000 ppm
Max. Inlet Free Chlorine	< 0.1 ppm

Specifications

Membrane Housings	High pressure, fiberglass reinforced plastic membrane housings
Frame	Structural fiberglass and aluminum
Controller Power Requirements	120V/60Hz/1Ph
Motor Power Requirements	230-460V/60Hz/3Ph
Pumps	Neutating disc design with positive displacement, brass pump head, Buna diaphragm, and stainless steel valve and seat
