

Dear Customer,

We are grateful that this catalog has found its way into your hands. As all of you know, catalogs do not happen by magic. A lot of hard work by the entire staff at SWT has played a part in its development. Your interest in our products is the reward for all our efforts.

For those of you that have been with us from the beginning, you may have followed the growth of our company by following the growth of our catalog. When we started, we had about 20 loose leaf pages. Now we are closer to 200 pages, and it looks as if we will be forced to start buying 2 inch binders soon.

The biggest changes in the catalog have involved the development of our industrial products, and the expansion of our UV lines. We are especially proud to be debuting our 10 GPM water conditioners with the integrated UV technology. These units won patent approval this year.

Personally, I believe that life should be lived with humor, charity, and trust. Friendship is the net result. From that perspective, you may occasionally find elements of humor in our catalog, and also some plain talk. This is an aggressive, hard working company, but we are human over here, and I want to allow that humanity to show from time-to-time.

So, here's the newest edition of our ever expanding catalog. Our goal is that we keep expanding our manufacturing capabilities and product lines, and we can do some long term business together. Our hope is that all of us can find friendship, humor, and prosperity along the way.

Sincerely,

Brett Oleskow,
Owner
