## COUNTERTOP WATER FILTRATION UNITS

SWT's Countertop Filtration Unit (P/N CT-10) is designed to conveniently and economically provide fresh, filtered water directly from your own tap. It comes with a special diverter valve to replace the aerator currently on your faucet. When filtered water is desired (for drinking, cooking, etc.), simply turn on your faucet and pull the diverter valve's piston knob to the "on" position. This will divert your regular, unfiltered tap water through the filter unit. From the unit's spout you will then receive clean, filtered water. Its proven design allows you to effortlessly switch between filtered and unfiltered water at any time.

The unit houses a 10 inch disposable water filtration cartridge. Cartridges are available to filter chlorine, bad taste and odor, chemical contaminants, and more. Put an end to the constant refilling of slow, small water filter pitchers and/or stocking up on expensive bottled water. The Countertop Filtration Unit makes unlimited, instant, filtered water available from your own sink.

Housing, cartridge, and fittings are tested and Certified by NSF International against NSF/ANSI Standard 42 for materials and structural integrity requirements only.

### Specifications

Property	Operating Limits	
	Maximum	Minimum
Water Pressure	125 psi (8.5 bar)	25 psi (1.7 bar)
Water Temperature	100°F (38°C)	35°F (1.7°C)
pH	10.0	5.0
Turbidity	10 NTU	0 NTU
Bacterial Quality	—	Potable *

Long reach faucets available.

\* Also available with an ultraviolet chamber — see Ultra Biolyte™ (Part Number SWT00500A).

## COUNTERTOP CARTRIDGES

SWT Countertop Cartridges effectively and economically filter the contaminants from your household water supply. These cartridges solve problems that were previously unsolvable without expensive and complex water treatment systems. Whether it is chlorine, taste & odor, or various heavy metals in your tap water, these disposable replacement cartridges ensure a healthy and satisfying solution.

**Carbon Impregnated Paper Cartridge** for chlorine, taste, and odor removal

**CF65005**  
Average Life:  
1 to 6 months

**Carbon Block Cartridge** for chlorine, taste & odor, chemical contaminants, and fine filtration

**CB67000**  
Average Life:  
5000 gallons

**Carbon Block Cartridge with Lead Reduction** for chlorine, taste & odor, chemical contaminants, & fine filtration

**LU90010**  
Average Life:  
6000 gallons

**Granular Activated Carbon Cartridge** for chlorine, taste & odor, and chemical contaminant reduction

**FH66001**  
Average Life:  
700 gallons

**Coconut Carbon Block Cartridge** for chlorine, taste & odor, chemical contaminants, and fine filtration

**CB67010-C**  
Average Life:  
1200 gallons

**Special Media Cartridge** for heavy metal removal

**METAL-AS-10**  
Average Life:  
1000 gallons

Use these cartridges		...to remove these elements							
Part Number	Description	Sediment	Taste & Odor	Chlorine	Chemicals	Metals <sup>1</sup>	Bacteria	Fine Filtration <sup>2</sup>	Cysts & Spores <sup>3</sup>

R = Recommended    A = Acceptable (Some Filtration Benefits)

These cartridges should only be used on drinkable water. Do not use these cartridges on water that is microbiologically unsafe.

- 1 Includes lead, copper, iron, sulfides, and other metals.
- 2 Less than 5 microns in size.
- 3 Includes giardia cysts and cryptosporidium.
- \* UV-10 cartridge is for use with Safe Water Ultra Biolyte™ filter systems.
